

Product	ProMix™ HCV Peptide Pool
No. of peptides	21 peptides
Quantity	approx. 25 µg / peptide
Description	This pool consists of 21 peptides, each corresponding to a defined HLA class I-restricted T cell epitope from Hepatitis C virus (HCV).
Sequences	<i>see overleaf</i>
Purity (HPLC)	>90% (determined at 220 nm; individual peptides)
Remark	The peptides of this product are supplied as trifluoroacetate salts
Storage	Store at - 20°C
Solubilization	Dissolve in a minimum amount of pure DMSO (approx. 40 µl) and dilute with PBS buffer to the final concentration. Please note that the final concentration of DMSO must be below 1 % (v/v) to avoid toxicity in a biological system.

Use recommended within 6 months.

Released by:
(dated as per product label above)
